## Past Performance

Department of Land and  
Natural Resources

## Differentiators

Five Years full unlimited Technical Support on all systems we design and build included at no charge.

We strive to use only US made components, materials and suppliers for our products.

We assign a single POC to each Customer for a one stop solution model regardless of size.

US Chamber of Commerce

Member

## CAPABILITIES

Solar Research Technologies LLC delivers high quality, innovative solutions for solar energy harvest and utilization to the Federal Government, private industry and corporations worldwide.

Our systems include solar generators, solar inverters, hybrid solar powered surveillance systems and commercial equipment including solar carports and canopies with EV Charging stations.

## CORE COMPETENCIES

- Solar Generators and Energy Storage Systems Custom Design
- Solar Hybrid High Resolution Surveillance Systems
- Solar Inverters, High Capacity Energy Storage Custom Solutions
- Remote Site Solar Communications Systems
- Prototype Machining and Design
- Custom Electronic Controllers for Solar Applications
- Welding and Fabrication
- Powder Coating for Harsh Environments
